Price: \$2.00 Per Year.

United Church

MISSIONARY ANIVERSARY
Empress:
 Church School, 2:00 p.m.
 Public Worship, 7:30 p.m.
 Social Plains, 2 p.m.
 Island, 3:30 p.m.
 In every land the Missionary preceded the church. We owe much to the missionary zeal and effort, and it is a privilege and duty to contribute to the cause.

Rev. Geo. A. Shields,
 Minister.

Ottawa

October 15, 1932

Parliament has now been in session one week and considerable progress has been made. Fitting tributes were paid to the member who had passed on since last session. The Governor General came down to the Senate chamber and read the speech from the Throne in the usual way. This speech is prepared by the Government and gives a review of recent events and a forecast of the legislation that will be introduced. The general tone of the message was hopeful although it was stated that problems such as unemployment were engaging the anxious attention of the Ministers.

One of the younger Members was asked to move that a humble address be presented to the King's representative, thanking him for his speech. This, as usual, started a full dress debate in which many of the members participated. I took advantage of this opportunity to explain as well as I could the situation in the Medicine Hat constituency and to urge the Government to take action to improve conditions. As in other years, I pointed out the necessity of giving some assistance to get a Beet Sugar Factory established in our district where cheap power was available and where splendid sugar beets could be grown on the irrigated lands. I also urged the Government to continue to give a bonus of some kind on grain in view of the extremely low prices. As people are more and more discussing money problems, I expressed what I believe to be the opinion in our district on this important question.

The Prime Minister is being

Milch Herd Passes Tubercular Test

Mr. Storey, of Calgary, visited the farm of Milton Leach, on Thursday, last week. He inspected the milch herd of Mr. Leach under the Federal Accredited Herd Plan for tuberculosis. The herd passed the test satisfactorily, and Mr. Storey returned to Calgary on Saturday morning, leaving via Alaska.

Death of C.P.R. Brakeman

Geo. Montgomery, C.P.R. brakeman, died on Wednesday, while on his run from Swift Current to Empress. Death took place near Cabri.

praised by his followers for his work during the Imperial Conference, but is certainly being severely criticised by other Members in the House. There is a real frankness about the discussions in the House of Commons. It is very common, to see a Member standing right in front of the Premier and the Members of the Government and to hear him telling them that they are floundering hopelessly, that they have disregarded their promises and that their policies have failed. On the other hand, Government Ministers will reply that criticism comes only from those who are anxious to get power for themselves, and from the soup-bowl creators with nostrums for the solution of problems.

The report of the Imperial Conference has been praised in the papers but time only will show the real results. We all hope that it will bring increased trade and prosperity but at this time when most people would like to see lower tariffs we doubt the wisdom of definitely fixing the rates at such a high figure and pledging all future Parliaments not to lower those rates. This will be discussed fully in the near future.

Sincerely, F. W. Gersbaw.

A smile cannot be bought, begged, borrowed or stolen, for it is something that is of no value to any one until it is given away. Some people are too tired to give you a smile. Give them one of yours, as none needs a smile so much as he who has no more to give.

Bishop of Calgary, Administrator of Sacrament of Confirmation

His Excellency the Bishop of Calgary, administered the Sacrament of Confirmation in the Empress Catholic Church, Wednesday, October 19th, to a large number of children and some adults.

His Excellency was assisted by the pastor, Father Sullivan, and also Father Lynett, of Oyen.

The church was filled to capacity, many people coming in from outside points.

His Excellency administered confirmation to a large class in the Cleveland Catholic Church, Thursday morning, October 20.

Enlarged Mun. Districts Map

We received this week a map of the proposed enlarged municipal districts, the boundaries are tentative and may be changed by the Government. The discussed best in the interests of all concerned, after discussion has taken place. The proposed enlarged municipal district directly north, will have the Red Deer river as a south boundary line; east, the meridian, north, up to and including township 32; west, as far as, and including, range 10. The proposed district South, will include all land between the rivers; west to, and including, range 11.

Annual Fish Week

Ottawa, October 18.—Canada's annual 'Fish Week' will be observed this year from October 24th to October 31st inclusive.

The observance has been arranged for by the Canadian Fisheries Association, a national wide organization, and the plan of setting aside a particular week in the year for purpose of directing special attention to the national importance of the fishing industry, and the diet value of Canadian fisheries products, has the cordial approval of the Dominion Fisheries authorities. Comment at the Department of Fisheries today was to the effect that while 'Fish Week' is planned by the industry itself, the department is keenly interested and commends it to popular notice.

Personal.—"A young woman, to whom black is particularly becoming, would like to meet a gentleman in poor health, object, widowhood."

Home-Built Airplane Crashes

The airplane built by E. J. Fletcher and H. W. Peacock, is to undergo a second test. Announcement of date will be made by poster.

The first test was at the farm of Mr. J. Peacock, 4 miles south of Mendham, and it is expected the second attempt will be held there. In the first try the plane gained an altitude of about 300 ft. when the motor commenced to rise and finally stopped. The ship was landed in a summerfallow field by Mr. Fletcher, the pilot, but overturned, doing damage to the plane, but luckily without serious injury to the occupants.

The plane instruments, struts and gas gauges and gasolator, are all home built, being made by Harvey Peacock with the help of a home-built lathe. Here are some of the specifications:

High-wing tractor monoplane. Span, 39 ft.; chord, 5 ft.; length, 10 ft.; motor—Cirrus, 4-cyl. line, air cooled, 85 h.p., 2200 R.M.P. Gas consumption, 54 pints per hour. Gas capacity, 20 Imp. gal. High speed, 120 m.p.h. Stalling speed, 42 m.p.h. Landing speed, 40 m.p.h. Weight empty, 760 lbs.; loaded, 1220 lbs.

Will the second attempt prove a success?

The railways of Canada broke a record of 42 years' standing in 1931 for the safe carriage of passengers. According to the first aid and safety first department of the Can. Nat. Rlys., only three passengers were killed on Canadian railways in 1931 out of 26,550,556 carried. There was also an encouraging decrease in the number of grade crossing fatalities. In 1931, persons killed at highway crossings numbered 84. This is the lowest figure since 1925. The number injured in crossing accidents was 321, which is fewer than in any year since 1924. In no train accidents, that is those occurring at stations, in shops, on the tracks, handling rails, ties, etc., low records were also achieved. In such accidents the number of people killed was 14 as against 19 in 1931, the previous low. Further, under these circumstances were 4,652. Many of these were slight, and this figure is the lowest since 1921.

Doctor (inquiring after boy who swallowed a half dollar):
 "How is the boy today?"
 Anxious Mother—"No change yet."

Bindloss & District Farmers' Club Seed Grain Fair

We wish to announce that the Bindloss and District Farmers' Club, will hold their 4th Annual Seed Fair, November 17th and 18th. Complete bills will be posted in a few days, but we wish to let the schools know that the school exhibit of art is confined to art booklets and scenes, two classes for hand-writing to be done as per sample sent out last spring.

A class for boys, 15 and under, for any hand made article, but not to take up more than two feet square. A class for girls, 15 and under, for an apron, all sewings and trimmings to be done by the exhibitor herself. A special prize is given by the Magic Baking Powder Co. A Silver Bowl is given by the Canadian Bank of Commerce for the highest aggregate score. —H. G. Moore, Secretary.

Planting Herbaceous Perennials

In the milder sections of the country most perennials can be planted successfully until quite late in fall, but where the winters are severe care should be taken so that planting is finished several weeks before the ground is hard frozen and a mulch of straw or other suitable material applied.

Perennials that have been grown from seed since in the spring and transplanted during the summer should be ready to put in their permanent places in September. If the ground is dry water thoroughly so that the soil adheres to the roots when the plants are lifted. If

planting in a border, group three to five plants of each variety together, leaving ample space so that each plant can develop to its full size.

Irish plants can be divided quite late in September, although July and August are generally considered the best time to do this. At the Central Experimental Farm we have found that Irish plants generally begin to show signs of falling after three or four years. When the flowers begin to show small the plant should be dug up and the oldest of the rhizomes discarded. Pieces with several fans of good healthy leaves should be chosen and three or four can be planted about a foot apart in a clump in a large border. In a small border a single division is sometimes sufficient. The soil where they have to go should be well dug and some bone meal added before replanting. The roots should be made firm but not so tight as to be just at the (cont. on back page)

France Fears Military Strength Sought By Germany, Says Herriot

Granat, France.—Premier Edouard Herriot declared in a public address, that military experts of unquestionable authority insist Germany is seeking sufficient military strength to defeat "with one thrust the designated adversary."

"The premier, whose speech outlined the French conception of disarmament with security, did not name the 'adversary.' He said the military authorities were trying 'to convince us' of the truth of their opinion, and then put the question to his audience in these words:

"In the same way that, formerly, Prussia took advantage of conditions imposed on her to build a redoubtable army of an absolutely new type, is not Germany military genius today searching to create an army... with the intention of striking to the heart with one decisive thrust the designated adversary... for whom national defence is but one form of patriotism?"

Plan Trip To Arctic

French Explorers May Undertake Journey Across Canada By Car
Montreal, Que.—French explorers who made expeditions into Africa and into Central Asia by caterpillar automobiles, may soon undertake a journey across Canada into the Arctic circle.

Jean Alouche, Parisian journalist, who described the previous expeditions, is in Ottawa to discuss the possibilities with General J. H. McEwen, commissioner of the Royal Canadian Mounted Police, and to map out for himself an advance route into the north country. The journalist reached here from France by the Comair "Aurora."

Alouche will proceed to Vancouver and thence to northern ports of the Pacific. He will visit outposts of the Royal Canadian Mounted Police and missions of the Oblate Fathers in the land of Eskimos. From Dawson City, which he knows well and has visited before, he will travel by aeroplane to Alkivik.

Valera Warns Cosgrave

Threatens Arrest If Platform Attacks
On Government Repeated
Dublin, Irish Free State.—A possibility that the former President William T. Cosgrave may be arrested and tried for his platform attacks on the De Valera Government, was suggested by Cosgrave's supporters.

A speech which he made recently in Galway especially angered the government and led President De Valera's newspaper, the Irish Press, to warn the former president if he repeats the charges he may be tried before a military tribunal.

Cosgrave commenting on the editorial, said he would repeat the charges in quietness and predict that De Valera would not have the courage to take such a step.

Judge Of Supreme Court

Ottawa, Ont.—Mr. Justice Oswald S. Crockett, of the King's Bench Division of the Supreme Court of New Brunswick, has been appointed judge of the Supreme Court of Canada. He fills the vacancy caused by the death late last fall of Mr. Justice E. L. Newcombe, a former member of the Nova Scotia Bar.

Canada Occupies Very Favorable Position In Grain Export Trade

Ottawa, Ont.—The present crop year commenced with Canada occupying a favorable export position—undoubtedly the best position held by the Dominion since 1928. The Canadian position at the present time is largely due to two main factors, namely, lack of foreign competition and price levels on a sound export basis." So says the monthly review of the wheat situation, issued by the Dominion Bureau of Statistics.

In regard to the domestic situation in Canada, it is stated that:

"The large wheat crop combined with a good export demand for Canadian wheat is stimulating the movement of grain in every position. Dur-

Indians Encamped On Ancient Reserve

Take Possession Of Land Near Selkirk, Manitoba

Winnipeg, Man.—Led by a militant chief a band of 35 families of the Saulteaux Indian tribe has defied orders of authorities and encamped on what they claim as their ancient reserve, 12 miles north of Selkirk, Man. The Indians claim the move marks the climax of a dispute of 25 years' standing. In 1907 the land surrendered the reserve at St. Peter's and under the terms of an agreement were to get \$80 per head and a reserve at Fisher River. Chief Grey Eyes, head of the band, claims his people never received \$80 and have been unable to make a living on the Fisher River reserve.

A Canadian Mounted Police patrol removed 35 families from their old stamping grounds. The natives, who had been trespassing on private lands since last July, camped along the road allowance.

Prince Opens British Trade Exhibition

Was Warmly Welcomed On Arrival In Danish Capital

Copenhagen, Denmark.—Eight thousand Danish accorded an enthusiastic reception to the Prince of Wales when he arrived to open the British trade exhibition.

The prince came by aeroplane from England, setting foot on German soil for the first time since the World War during a stopover at Hamburg. He reached Kassel airport, near here, at 6:25 p.m. A fleet of Danish military and naval aircraft flew over the field.

"It has been 20 years since I visited Denmark," the prince commented. His distant cousin, Crown Prince Frederik, greeted him on his arrival. The Prince of Wales' grandmother was the Danish Princess Alexandra. Other members of the royal family joined in welcoming him.

Further Pay Cut For C.P.R. Officials

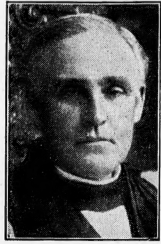

President Hopes Reduction Will Not Be For Long

Montreal, Que.—On October 1 railway reductions will be effected among all the higher officials of the Canadian Pacific Railway. According to an official statement the president, directors and members of the executive committee will accept a cut of 15 per cent. Salaries of general, district, divisional and departmental officials will be lowered 10 per cent.

Hopes was expressed by E. W. Beatty, president of the railway, that it will not be necessary to continue the reduction rate for too long a period, and that the former salary schedule will eventually be restored.

Debate Is Delayed

Geneva, Switzerland.—The World Disarmament Conference Bureau, resuming its deliberations without a representative from Germany, postponed discussion of the German demand for arms equality so that the German government might have time to respond to a letter urging it to continue participation.

Bishop Owen of Niagara and Dean Carleton of Montreal (left and right respectively), are two of the prominent Church of England dignitaries who are mentioned most frequently for the post of Bishop of Toronto. The election takes place on October 24th when a successor to Archbishop Sweeney will be chosen by synod delegates.

Hutchinson Says Route Was Safest Possible

Wrecking Of Trans-Atlantic Plane Just Bad Luck

Aberdeen, Scotland.—The Hutchinson family, who with their crew of four were rescued from the Heath Greenhead coast after wrecking their trans-Atlantic plane recently, landed at Errol, Scotland, from the steam trawler, "Lord Talbot."

George Hutchinson, his wife and two small children were well, although the two girls appeared to be tired. They are en route back to New York.

"If our radio had a little more range we would have been able to pick up our bearings and would have been all right," Hutchinson said, describing the accident.

Hutchinson said he wanted it understood that the adventure of his "young flying" was not a "stunt flight."

"The children have always been with us in our flying," he said. "Our route was the safest possible, and we only had 14 miles from safety when the accident happened. It was just a bit of bad luck."

British Columbia Is In Premier Position

Able To Meet Its Current and Future Obligations

Victoria, B.C.—British Columbia is in no danger of passing under the wing of the Dominion Government to meet its current or future obligations. On the contrary, with sinking funds set aside on a basis to retire \$500,000 of its net debt of \$11,000,000, in the next ten years, the province occupies a premier position among Canadian provinces. This conclusion emerges from the official government comment on the Kidd commission report, made public.

Praise For Commission

Work Was Well Done Says Sir Henry Thornton

Montreal, Que.—Having regard for the magnitude and complexity of the task which confronted the royal commission I think it has done its work quite well and has recommended machinery for the consideration of desirable and constructive objectives," said Sir Henry Thornton, late president of the Canadian National Railways, commenting on the summary of the transportation commission's report issued at Ottawa.

MacNeill, K.C., Vancouver, B.C.—Canadian Pacific Railway Photo.

Judge Of Saskatchewan Court Of Appeal Heads Manitoba Inquiry Board

Ask Aid For Bay Route

Regina Men Want Traffic Department To Solicit Shipments

Ottawa, Ont.—Establishment of an active traffic department by the government which would solicit shipments for the Hudson Bay Railway and the northern ocean port of Churchill has been urged on Hon. R. J. Manion, Minister of Railways and Canals. This step was advocated by A. Ewart, present commissioner of the board.

"Mr. Manion received us very cordially and courteously," said Mr. McKee. "We are assured the matter would be given consideration."

Both Regina men advanced the opinion the government, to crown its work in providing an outlet to the sea for the prairie provinces, should have an active traffic department in order that importers may route as large a portion of their goods as possible via the new trade channel.

"Through the Hudson Bay Railway, western Canada is brought 1,000 miles closer to the markets of the United Kingdom," said Mr. McKee. "When the insurance rates come down as a more equitable level, a material saving will be effected in export costs," he added.

Some 250,000 bushels of wheat were exported to Great Britain this season. Over the northern route, and Mr. McKee stated the first shipment of 250,000 bushels had been carried out at a saving of approximately a cent a bushel.

Churchill May Have Oil Distribution Plant

Manitoba Government Has Application For Grant Of Land

Winnipeg, Man.—Establishment of an oil distribution centre at Churchill may take place within a year or two. The Manitoba Government has before it an application from the Imperial Oil Company for a grant of 50 acres of land adjoining the dock district on which they wish to erect gasoline and oil storage tanks.

The government has not yet passed upon the application and local officials of the company said the matter was being handled from the head office of the company in the east.

It is understood the plan is to ship oil products to Churchill by tank steamer from Halifax for distribution through the west.

A ship agent from England was landed at Churchill this season, consigned to firms in Winnipeg, Regina, Saskatoon, Edmonton and Calgary. It is claimed many points on the prairies can be served with oil more economically from Churchill than from any other port.

Japan May Leave League

New York.—Hiroshi Satou, arriving in this country to be charge d'affaires at the Japanese embassy during Ambassador Katsumi's absence, declared that his country "would not hesitate a minute" to withdraw from the League of Nations if it finds itself "compelled" to by the report compiled by the commission headed by Lord Lytton of the United Kingdom.

Winnipeg, Man.—Hon. W. F. A. Tupper, judge of the Saskatchewan Court of Appeal, will head the board of inquiry which is to inquire into the affairs of the University of Manitoba, Saskatoon, and C. G. K. Nourse, of Winnipeg, former manager of the Canadian Bank of Commerce here.

Appointment of the board follows disclosure of shortages in university endowment funds which Thursday, September 22, resulted in John A. Macbrach, K.C., former bursar and chairman of the board, resigning, being sent to penitentiary for seven years for theft of \$500,000 of university moneys.

Selection of a judge, a university president and a business man for the board is in pursuance of the government's policy of making the inquiry as broad and searching as possible. The legal, investment and educational angles of the situation will each be explored under an expert inquirer.

In addition to rooting out the cause of the present debacle and fixing responsibility the board will be expected to make constructive suggestions for the future guidance of the government and the university authorities.

In a statement Premier Bracken said:

"Now that the criminal charges which have been before the courts in connection with the University of Manitoba trust funds have been dealt with, and in accordance with the decision announced some days ago, the situation with respect to the funds has been determined and the members are being asked to proceed immediately with their work."

All Canada's Gold Comes From Mines

No Swindle Here Such As Reported From Washington

Ottawa, Ont.—Practically all the gold which flows into the mint here comes from the mines. It was stated at the department of finance.

Despatches from Washington state that action has been taken there to keep swindlers from buying gold and jewelry at bargain prices on the pretence that they want the metal for industrial purposes. Later this gold is melted down and taken to the mint, there to be exchanged for currency.

Apparently no such swindle has gained any headway in Canada.

Chinese Won Case

Logic Of Court Was Convincing For Toronto Magistrate

Toronto, Ont.—Unanswerable logic of the Ontario case for Lee Hsien-shan, Chinese Consul General, against dumping rubbish over his back fence on a piece of city property.

Arguing his own case Lee reasoned that the grass on the lot was nearly a foot high but where the rubbish lay there was no grass at all. Therefore, it had lain on the ground for a much longer period than two weeks.

Lee moved in only two weeks ago. Magistrate Arthur Tinker, speeches, dismissed the case with a wave of the hand.

Russia's Request For Early Study Of Arms Reduction Is Granted

Geneva, Switzerland.—The League of Nations council meeting was confronted with a veritable kaleidoscope of international developments, which were touched off when Russia was asked to consider the Russian demand for speedy consideration of substantial arms reduction plans.

This development came in the conference bureau, a sort of steering committee for the general conference, which is expected to resume soon. Maxim Litvinov, the Russian delegate, pressed the Russian take-up of the Russian demand for a Russian proposal of the United States for a one-third cut.

The two gravest problems before the council are the German demand for equality of armaments on a threat of withdrawal from the disarmament conference, and the filing of the re-

Success Crowns Efforts Made To Save Antelope Herds In Their Native Habitat

Canada's success in bringing back the buffalo has been acclaimed by wild life conservationists in many parts of the world but little has been said of her successful efforts in saving the prong-horned antelope in its native habitat in Western Canada. The march of settlement in the West made disastrous inroads on the numbers of these timid animals and when their condition was brought to the attention of the Dominion Government immediate action was taken through the Department of the Interior to establish reserves for their protection and propagation. In 1914 the first sanctuary to be established was that to be later known as Watkins Park, an area of 54 square miles in southern Alberta about 75 miles east of Lethbridge. Early in 1915, an area, later to be known as Nemiskam National Park, about 25 miles north of Medicine Hat, Alberta, was set aside for the protection of antelope in that district and since then the success of the Department's efforts has been most remarkable.

The main work in the conservation of the antelope is being done at Nemiskam Park since the area of eight and a half square miles comprising the sanctuary is fenced and a definite record of the progress of the work can be kept. The herd of approximately 425 antelopes in this park represents the results of an interesting experiment. Previous to 1915 efforts at raising antelope in captivity had been unsuccessful owing to the effects of the shock of capture. Consequently officers of the National Parks Branch of the Department of the Interior, in charge of the work, hit upon the scheme of corralling a herd of antelope on a suitable grazing area. A herd of forty-two antelopes were observed feeding north of Medicine Hat, and as observations of these animals in the wild without disturbing them was successfully carried out. Since then they have thriven evidently unconscious of their capture and these graceful native animals are rapidly being restored in numbers.

At Watkins National Park, as far as observations of these animals are concerned, the antelope which frequent this unfenced reserve are increasing. Concentrations of the animals are noticeably greater throughout the area than previous to the establishment of the park and their future in this part of the province appears assured.

Higher Wheat Price Needed

Would Do More Than Anything Else To Bring West Back

However, taking Western Canada as a whole this will not be a debt-paying year. Most farmers will be able to meet their current bills and their taxes and to provide for seed and feed. The more fortunate ones will also have enough to pay the current mortgage interest.

The crop is big enough to make every few cents advance in price important. Westerners are not looking for higher prices, they are praying for them nevertheless. No single factor could do more to bring back the West than a rise in the price of wheat. Nothing else can do the job alone.—Financial Post.

Money In Pie Business

The pie business has been good in Chicago to George Knapgar, 72. He was peddling individual pies when Policeman John Frye asked him about his license. "I can't afford to pay the money on licenses," he said. So the policeman searched him to see just how poor he was. In a pocket of his trousers there was \$7.16.

"Miss Margaret Jones, aged 85, has just resigned as bell ringer at the Llandow-Aberarth, Wales, church.

"You only married me for my money."

"Just the opposite, dear. Because I had none."—Wahne Jakob, Berlin.

W. N. U. 1961

Wealth From The Land

Increase In Revenue From Alberta's Farm Products Is Expected

Several million dollars' increase in revenue from Alberta farm products is expected in 1932, according to the 1931 figures, compared to financial men.

The 1932 revenue is expected to exceed \$152,000,000 compared with \$147,000,000 in 1931. Alberta's farm animal production for 1932 will total \$18,000,000 it is estimated. The dairy industry is estimated to realize \$12,000,000, while poultry and poultry products may reach \$9,000,000. Miscellaneous commodities, it is believed, will return \$300,000.

These figures, added to \$11,000,000 set as the value of this year's field crops, result in the estimated \$152,000,000 total.

This does not allow for probable increases in market prices, if any improvement in price occurs the total will be much larger, it is pointed out.

Reducing Temperature

Offices Cooled As Well As Heated By Steam

A system for cooling business offices by steam has been tried with success in Detroit. Steam under high pressure is passed through a nozzle at high velocity where it acts as a pump to remove the air and vapor from a tank of water. This produces a vacuum, cools the water rapidly, and the water is then pumped through cooling coils to reduce the temperature in the rooms. Modern science has thus destroyed another illusion, that janitors only work in the winter months.

(By Ruth Rogers)

ASSISTANT (to Beach Inspector): "What are we to do about that one down there, sir? She's wearing a bit of costume and then wait a bit before the next lot."—London Opinion, Eng. and

Mild Winter Predicted

Cree Indians Say There Will Be Lots Of Snow

Western Canada can prepare for a mild winter with plenty of snow. A late fall and an early spring will cut down the winter far below its usual length. That's the decision of the official weather men of the Cree Indians at The Pas, Man.

Year after year the Indians have been calling the turn on the weather and always correctly. The uncanny skill of the aborigines in forecasting the weather for the coming season is highly respected in the north country. To gain their information they closely observe the actions of muskrats and other animals at this time of the year.

Paris Fighting Ants

Paris is fighting its third invasion of pests. First a swarm of mosquitoes visited the French capital. Then followed a plague of blue flies. This time it is ants. The health department has marshalled all its forces, armed with sprays, disinfectants and other paraphernalia, and is directing an onslaught on the invaders. A number of bakeries near the bourse and other buildings in other parts of the city have been overrun by the busy insects.

About nine per cent. of the forest fires are due to railroads, it is found.

China has decided to participate in the Chicago exposition next year.

Churchill Could Have Handled More Wheat

Shipping Agent Disappointed In Amount Of Tonnage Offered

With the successful clearing from Churchill of all boats in that vicinity, some 2,000,000 bushels of grain will have been exported in the first commercial season of the Hudson Bay route. Thomas Harling, shipping agent, said at Montreal, Eight steamers were chartered this year to carry grain overseas from the northern port.

"It would have been possible to handle a much greater quantity," Mr. Harling said, "and I am a little disappointed that more tonnage did not come out." The area about Prince Albert and Saskatchewan can provide approximately 45,000,000 bushels for shipment through Churchill annually, he said.

Free storage in the elevator at Churchill and elimination of transfer charges had been of assistance in promoting use of the new route, but Mr. Harling expressed the belief that establishment of ordinary rates, such as prevail in Montreal and other ports would have little effect on the volume of shipments next year.

The question of rates at the Hudson Bay port would probably be dealt with in the report of the transportation commission, Mr. Harling said.

Neptune's satellite is supposed to be as large as our moon and it moves around the planet in a little less than six days.

Exports Of Home Grown Wool Have Developed Rapidly During The Past Few Years

Plymouth Rocks Sent To Arctic Outpost

Aktivik Residents Look Forward To Having Fresh Eggs

No longer will residents at Aktivik, one of the last outposts in the western Arctic, sigh for nice fresh eggs. Aktivik, which is more than 1,800 miles north of Edmonton and up in the Arctic circle, has had its population increased by thirteen pullets and two roosters, and the residents will have fresh eggs—that is if the hens continue to lay.

G. M. Corrie, provincial poultry commissioner, shipped the feathered stock to P. Stromberg, described as a "poultry tender of Aktivik." Aktivik has no chickens at the present time, it is stated.

The chickens travelled by train to McMurray and then by boat to Aktivik. They are pure-bred-to-lay barred Plymouth Rocks and are five-and-a-half-months old pullets.

The hens are in good condition to face the long winter darkness of the north. On the trip north they were fed a special laying mash and wheat grain to keep them laying until they arrived.

In announcing the trip by the chickens, the poultry branch remarks that civilization is going north. In this connection it might be recalled that a team of horses went as far north as Arctic Red River by boat last year to do various pieces of work around different ports. At Arctic Red River charrers who had never seen horses gaped with amazement at them and called them "big dogs."

Imagine The Host

The somewhat shortighted girl had reached a stage of the game when desperate measures were necessary. Taking a tall hee she snatched a small, round object from the heavens for the fall. "Where did that one go to, caddy?" he asked in a voice of great hope. "A couple of feet behind you, sir," answered the boy gloomily.

irate Parent—"Didn't I see you kiss my daughter, sir?"

Nervy Youth—"How should I know? Do you think I'd be gawking around when I was doing a thing like that?"

HUNTING IN CANADA

WIDE VARIETY OF

BIG AND SMALL GAME

HUNTING GROUND

EASILY REACHED

SEASONS OF GENEROUS LENGTH

HUNTING GROUND Easy Of Access Accessibility is an outstanding feature of much of Canada's hunting territory. The country is well served by roads, railways and steamboat lines, over which the sportsman may travel in comfort to the "going in" point. Areas previously inaccessible may now be reached by airplane in a few hours' flight. Detraining or going in points are numerous throughout game areas and at these will be found reliable outfitters and qualified guides, who are prepared to look after the sportsman's every need and guidance while in the hunting territories. In several of the provinces it is compulsory for the hunter to be accompanied by a guide. In some of these provinces where it is not compulsory, it is often advisable to employ a guide. These men, being familiar with the territory in which they operate, are able to add greatly to the enjoyment and success of the trip.

Conservation Of Game In Canada a game force of conservation is found in the setting aside of tracts of public lands, as game reserves, and in the rigid protection of game in its extensive national and provincial parks. In game areas the game multiplies rapidly, under protection, and spreads over into the surrounding country. This favorable condition, coupled with sound protective legislation regulating the open seasons, bag limits, issuing of licenses, etc., assures continuance of a supply of animals and birds in their natural haunts. Canada is thus able to offer the hunter exceptional opportunities for sport in season.

Hunting With Camera To the camera-hunter and the student of wild life, the Canadian Province offers unusual opportunities for interesting experiences and records. The hunter is encouraged to take to the camera-hunter and, throughout this year, he will find favorable conditions to study the habits of game animals and birds and to photograph them in their natural surroundings.

Game Laws Of The Provinces The game laws of the different provinces are drafted by the provincial governments with a view to meeting local conditions; consequently there is no uniform game law for the Dominion as a whole. As these game laws are subject to revision from year to year, persons contemplating a hunting trip are advised to obtain copies of the current game laws and regulations of the province in which they intend to hunt. The National Development Bureau of the Department of the Interior at Ottawa will gladly supply information on hunting in Canada, by either compiling with requests, or referring to other sources from which the particulars desired may be obtained.

Are Safely Kept

Units of eight measures are safely buried in England and are dug up every tenth year. The standard yard measure, made in bronze, and the stone which weighs one kilogram, of platinum, are kept in the treasury of the House of Parliament.

The Bulgarian language is spoken by approximately 5,500,000 people.

"Where does this path go to?"

"It doesn't go anywhere. Can't you see how small it is?"—Gutierrez, Madrid.

"You only married me for my money."

"Just the opposite, dear. Because I had none."—Wahne Jakob, Berlin.

W. N. U. 1961

A Gratifying Comeback

Conditions in Saskatchewan Outlined by Winnipeg Tribune

Saskatchewan has staged a 90 per cent comeback in one short year and the big crop areas of the province represent substantial buying power this year, says W. L. Sturges, editor of the Winnipeg Tribune, who has made a survey of conditions.

The Tribune article, from Regina, reads in part:

"Last year the government had to find \$18,000,000 for relief. This year \$1,000,000 will be ample.

"This spring \$100,000 acres were seeded with wheat supplied by the government. Next spring requirements will not exceed 100,000 bushels.

"Last year 58,000 families required relief. This year there will be 9,000 families.

"Ninety per cent of the farmers of the province will be able this year to pay current year's taxes, repay the government for seed, binden twine and binder repairs; pay all expenses of the year's work, and have enough money left to live until after harvest and to next spring's seeding without assistance.

"Three-eighths of the province yielded 20 bushels to the acre or over; one-fourth 15 to 19 bushels; one-fourth 10 to 14 bushels; only one-eighth averaged less than 10 bushels.

"Saskatchewan government will balance its budget this year. Rural municipalities will be able to operate in normal fashion. There are no unemployed in Saskatchewan cities; they are in harvest fields together with many hundreds of transients."

British naval exercises near Portland Bill, England, were abruptly terminated when a collision occurred between the mine-sweeper, "Dundalk," and the submarine "H35" in fog. There were no casualties although above the water-line. Above is a picture of the submarine, one of the most highly efficient classes in the navy. Halted above is one of the smallest type left in the British navy, the "H35" submarines are capable of crossing the Atlantic Ocean under their own power. Inset is a picture of the "Dundalk."

Judge Kept His Word

Suited Mr. Baldwin As Lister Passed Island Home

An incident in connection with the departure of the Rt. Hon. Stanley Baldwin, Mr. Baldwin, and the other United Kingdom delegates to the Imperial Conference, on the "Empress of Britain," will remain as an interesting souvenir to Judge Camille Pouliot and the members of his family on the island of Orleans.

Five years ago when Mr. Baldwin came to Canada as Prime Minister he was presented by Judge Pouliot with an English edition of his book on the island of Orleans. On his return, Judge Pouliot sent Mr. Baldwin a French edition of his book, as an appreciation of the request of Mrs. Baldwin at the Imperial Conference banquet that "O Canada," be sung, and invited Mr. Baldwin to visit him at the Manor Maude-Genest, the Pouliot home on the island.

"If we cannot have the pleasure of your visit, we shall salute you as the 'Empress of Britain' passes our home on the island," wrote Judge Pouliot. Accordingly, as the liner was passing the point on the island where lies the Manor Maude-Genest at St. Jean, westward on the bridge and deck of the "Empress" saw the English and French flags, floating at their mastsheads dipped three times. At the request of Mr. Baldwin, the "Empress of Britain" responded with three blasts from her siren.

Tomato Was Originally Ornamental Plant

Not Recognized As Nutritious Fruit Until Nineteenth Century

With the tomato so widely used and enjoying such universal popularity as it does today, it seems hard to realize that for nearly two centuries it was used only as an ornamental garden plant. Like the tobacco plant, the tomato is a native of the Western Hemisphere, its original habitat problem having been Peru. The natives of Mexico called it *xitomate* and its first appearance in North America records also for 1591. It was not until the nineteenth century that the tomato, one of the most nutritious of fruits, came into popular favor on this continent. — Dominion Fruit Branch.

Sweet Clover For Silage

Better To Get Crop In Quickly After Cutting

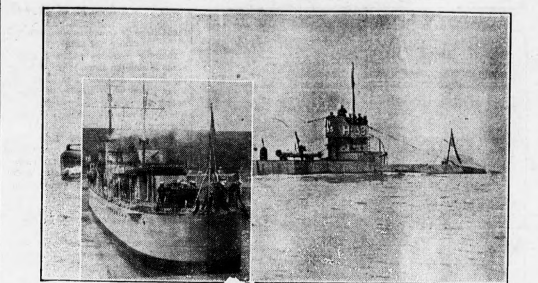

The most suitable stage at which to cut sweet clover for silage is when the majority of plants are in full bloom," writes E. S. Hopkins, Dominion Field Husbandman, in his annual report for 1931. He also observes "It is feasible to haul the crop to the silo immediately after cutting or within two or three hours, while the addition of water to sweet clover silage is not to be recommended. As the case with oat-sprout ensilage, sweet clover held in storage for the silo for periods varying from three to nine months does not appear to maintain any damage or lose any of its palatability.

Britain Still Farms

It may amaze some people to learn that the value of the output sold out of the farms of the United Kingdom exceeds that of agricultural production in either Canada or Australia. For the average production year, it is estimated by a writer in the London Times at £200,000,000, as against £275,000,000 in the dominions mentioned.

Nyasaland now has only five horses, and Kenya Colony only four.

MINESWEEPER AND SUBMARINE COLLIDE DURING EXERCISES

British naval exercises near Portland Bill, England, were abruptly terminated when a collision occurred between the mine-sweeper, "Dundalk," and the submarine "H35" in fog. There were no casualties although above the water-line. Above is a picture of the submarine, one of the most highly efficient classes in the navy. Halted above is one of the smallest type left in the British navy, the "H35" submarines are capable of crossing the Atlantic Ocean under their own power. Inset is a picture of the "Dundalk."

Piano May Come Back

Once Popular Instrument Has Made New Friendships Over Radio

In the piano, the source of so much household enjoyment before the appearance of the phonograph and the radio, in process of staging a comeback? Some observers say that it is and that people who disposed of their pianos for a mere song a few years ago are now returning to purchase of these instruments.

At first when the piano began to go out of the homes and radios to come in instead, the musicians looked exceedingly dubious. Here was further music listening, often simply hearing being substituted for the active joys of music-making with its continual challenge to resourcefulness, its endless discoveries and hardwrought triumphs. This passivity was worse than it had been with the gramophone, they argued.

But the musicians, fearful of their art, were reckoning without the piano. What new friendships it has made over a satisfactory commercial radio. Countless listeners, old and young, have been led into regions of undreamed-of wonder where the piano plays its brilliant part. They have thrilled to its sweep and powerful master hands and to its imperious accents and marvelous subtleties of rhythm and color. They soon recognized its capacity for limitless limitation. Now in greater numbers than before, they are wanting for themselves this efficient servant—the most highly organized mechanism ever invented for the making of music by one performer.

Challenge Of Old Habits

Makes-Going Heavy Now That Times Are Hard

It's not keeping up to the Joneses that makes the going heavy and slow for the average man in the country, but keeping up to what it used to be. Ten years ago when the auto demanded an extra two dollars a week a threat of a strike would fetch it from the boss, now the boss is on the sea shore smoothing the wrinkles out of his brow, and the man has to do his own sweating, and now the challenge of old habits makes a heavy demand on him. Indeed it is hard for the man who has faced sumptuously for a long period to return to buckwheat pancakes and fried pork. It's his taste that has changed, but he thinks the pancakes are not as good as they were in the days of his youth.

English Apiarists Worried

Nectar Of Lime Tree Has Intoxicating Effects On Bees

Beekeepers are shocked—For their bees insist on getting drunk. Several have written to a London newspaper about it.

The bees, they say, appear to be in helpless attitudes on the ground, falling off their flowers, returning to work, and lapsing into drunken stupor.

"Drunk? Oh, yes, the bees really are drunk. Their condition is due to the nectar of the lime tree. It had some strange toxic ingredient which has not been fully investigated.

"Only one or two other plants have the same effect. The bees have to visit a good many lime flowers to drink an intoxicating quantity of nectar, but eventually he is overcome and falls to the ground.

"It is exceedingly dangerous for a bee to get drunk. If left alone he will come round in a few hours. But too often, when he is so drunk as to be helpless, a bird just eats him.

"Wages are even more dangerous when under the influence of an intoxicant. Over-ripe Victoria plums, eaten as they are on the ground, makes wages drunk. When moderately drunk they go mad, and get busy with their stings; when thoroughly intoxicated they go to sleep.

"Bees have not enough wits to bore through the skin of a plum, but they sometimes seize the opportunity of a cracked plum to get drunk."

British Cannery Face Crisis

Fruit Supply Follower It Has Been In Years

What can a cannery can when there is nothing left to can? That is the crisis which the British canning industry faces in a year when it hoped to reach its apex. There is no fruit to can. The shortage is so great that canning factories are running on half time.

The reason is two-fold. The fruit supply has been the poorest in years, and the tariff is so high that foreign fruits are being kept out, and the demand for English fresh fruit has increased.

Part of the wall of the 200-year-old "cage" at Camberwell, England, believed to have been used by Dick Turpin, has collapsed.

The new Strahov Stadium, being built by the government in Prague, Czechoslovakia, will cost \$210,000.

FANCIFUL FABLES

I DON'T THINK I'LL BE DOWN TODAY, SERGEANT. IT LOOKS LIKE RAIN.

Daily Service From Churchill Possible

Professor MacEwen Predicts Great Development Of Saskatchewan And Alberta Grass Fed cattle pastured through Churchill to the British markets, with daily shipments of Saskatchewan grain to the world's markets during the navigation season was a word picture of possible development of the northern port portrayed by Prof. J. G. W. MacEwen, of the animal husbandry department of the University of Saskatchewan, at a service office meeting in Saskatoon.

A new attack is to be made on the problem by studies in Finland, where the Carnegie Institution of Washington is working with the Geological Commission of Finland to measure the radioactivity of pre-Cambrian rock formations. Of all the rocks in the world, those of Finland are chosen because their geological age can be closely estimated, and the successive rock layers of the earth's crust are in a comparatively undisturbed condition.

The basis of estimate of the earth's age is the relatively simple calculation of the rate of the decay of the sedimentary sea deposits into stone, together with other scientific guesses at the rate of cooling of the earth's interior. Recovery of the fact that nearly all surface rocks contain minute quantities of radioactive elements has seriously upset the figures based on the measurable cooling of the earth. It is known that some of the loss of heat comes from this radiation.

Measurement of the loss of heat by radioactivity in Finland's oldest rock formations is intended to correct still further the Kelvin calculations. This may bring them much closer to estimates based on other evidence, so that some day science may be able to establish the age of Mother Earth within a few million years or so. — New York Evening Post.

After Forty Years

League For Human Rights Commemorating Release Of Dreyfus

Nearly 40 years after the treason case which brought his name before the whole world, Lieutenant-Colonel Alfred Dreyfus, now living a sequestered life of retirement at age of 78, is the shipping season, the prevalence of ice and fog and compass difficulties.

The Earth's Age Interests Scientists

But Problem Is Still Far From Being Solved

It would be within the scope of scientific statement to say that the number of all things living in the earth itself. It may seem a little discouraging, therefore, to inquire too closely into the age of the spinning globe which has nourished every generation of life since the beginning, but such calculations and speculations are of perpetual interest to scientists.

A new attack is to be made on the problem by studies in Finland, where the Carnegie Institution of Washington is working with the Geological Commission of Finland to measure the radioactivity of pre-Cambrian rock formations. Of all the rocks in the world, those of Finland are chosen because their geological age can be closely estimated, and the successive rock layers of the earth's crust are in a comparatively undisturbed condition.

The basis of estimate of the earth's age is the relatively simple calculation of the rate of the decay of the sedimentary sea deposits into stone, together with other scientific guesses at the rate of cooling of the earth's interior. Recovery of the fact that nearly all surface rocks contain minute quantities of radioactive elements has seriously upset the figures based on the measurable cooling of the earth. Measurement of the loss of heat by radioactivity in Finland's oldest rock formations is intended to correct still further the Kelvin calculations. This may bring them much closer to estimates based on other evidence, so that some day science may be able to establish the age of Mother Earth within a few million years or so. — New York Evening Post.

Rare Old Testament

Has Been Reproduced

Original Manuscript Was Made in Thirteenth Century

A reproduction of a rare illuminated 13th century manuscript of the New Testament, which survived the fall of Constantinople to the Turks and was discovered 700 years later in a Paris antique shop, was released by University of Chicago on September 14, constituting one of the last contributions of culture by the late Mrs. Edith Rockefeller McCormick.

The original manuscript was purchased in 1927 by Mrs. McCormick after its discovery in the Paris shop by Dr. Edgar J. Goodspeed, professor of New Testament history.

Mrs. McCormick retained Mrs. Edith Rockefeller McCormick New Testament. The intricate miniatures illuminating the ancient manuscript and authorship of the New Testament have been reproduced by the university in a limited edition as a source for scholars under the title "The Edith Rockefeller McCormick New Testament."

Professor Goodspeed said the manuscript was made in the 13th century in the scriptorium of the palace of Michael Palaeologus, one of the last emperors to rule over the glories of Byzantium, and that it was known technically as "Codex 2460."

Trend Now Upward

It seems to be the general consensus of opinion that the proper foundation for business recovery has been reached. That means that from now on the trend is bound to be upward. When it is realized in the mercantile world and with the general public that there is no possibility of lower prices for commodities or necessities of any kind, an incentive to greater buying is inevitable.

The breed of Jersey cattle on the Island of Jersey had kept pure and apart for 300 years.

Many a man who thinks he is a free thinker is on a free talker.

"I never contradict my wife."

"Nor I mine. I have only to wait and she contradicts herself." — A.H. for Ails, Stockholm.

Marble was introduced into Roman building no earlier than the first century B.C., and was then viewed as sacred as something associated with Greek luxury.

"I hear you are having a new house built."

"Of course. Ever hear of anybody having an old house built?" — Vart Horn, Stockholm.

Try Lydia E. Pinkham's Vegetable Compound

Too "Worn-Out" to go

Another day broken... Couldn't stay on her feet a minute longer! Lydia E. Pinkham's Vegetable Compound always relieves cramps. Try it next month.

WORLD HAPPENINGS BRIEFLY TOLD

Sir Ronald Ross, noted authority on tropical diseases, is dead, aged 75. The adventurous whaling industry may be revived to prosperity on the British Columbia coast as a result of a rise in oil prices of 20 per cent.

Rolling an automobile tire before him, Emory Cross took off from Weland, Ont., on a seven-year jaunt around the world.

The city of Tarrus, home of Saint Paul, was swept by fire. The flames destroyed 144 houses with the loss of \$100,000.

The admiral ordered the fleet to be laid on October 1 for Germany's third "pocket battleship," to be known for the present as "armored ship C."

For lack of funds Berlin streets have for years been badly neglected that a number of important thoroughfares have now been closed for heavy trucks.

Mrs. W. Thrift, of Sildup, England, whose husband was reported missing during the World War, has just been notified that he was killed near Cambrai.

A number of Alberta areas face a potato shortage because of two months of hot weather without rain this summer, according to Calgary merchants.

Sweden is motorized. Of every 100 vehicles one meets on its roads, only 11 are horse-drawn, the annual Swedish Road Congress at Gothenburg, Sweden, was told.

Sir Henry Simson, the physician who was in attendance at the birth of Princess Elizabeth and Princess Margaret Rose, children of the Duke of York, died suddenly of a heart attack. He was 60 years old.

Big Fur Shipment

Furs To Value Of Half A Million Arrive From H.B. Region

A ton and a half of fur from the northern barren lands, principally from along the west coast of Hudson Bay, passed through The Fur, Man., recently, on the way to the markets of the world. The shipment is valued at roughly half a million dollars. The fur-fox, mink, marten, was caught during the past year by Eskimos, Indians, and white trappers in the sub-Arctic wastes. Only the richest and most choice fur was brought down.

From Chesterfield Inlet and other points it was flown to Churchill by the three Junkers' planes of the Canadian Airways, and then loaded on to the famous muskrat train that plies between the northern port and The Pas, Manitoba.

The fur will go by Canadian National Railways to the Revillon Freres Company in Canada and the Hudson Bay Company in London, England.

Epitaph Was Fitting

Tombsman Dealer (after several futile suggestions): "How would just a simple 'Gone Home' do for an inscription?"

The Widow: "I guess that will be all right. It was always the last place he ever thought of going."

A: "Do you know your wife is telling everyone you can't keep her in clothes?"

B: "That's nothing. I bought her a home and I can't keep her in that either."

It is so much easier to succeed after the others have quit.

"If that is art, I am a fool."
"Yes, it is art and the best kind."
—Buen Humor, Madrid.

Gift For Schenectady Historical Society

Office Chair Was Once Owned By Thomas Edison

A large old-fashioned chair owned by Thomas A. Edison, in the early days of the Edison General Electric Company, has been presented to the County Historical Society by the General Electric Company. It has witnessed in a sense the whole growth of the electrical industry in Schenectady. Amos Underwood, president of the company, presented the chair to the Schenectady works, fell heir to it on the retirement of Langdon Gibson, former production manager of the Schenectady works, Gibson obtained the chair early in his career with the company and carried it with him from office to office.

Believe It Or Not

Earthworms In Australia Attain Length Of Ten Feet

An earthworm, native to south-eastern Australia, attains extreme lengths of ten or twelve feet and diameters of three-fourths of an inch, although the average specimen is only three or four feet long. It belongs to the same species as our common earthworm. The progress of these gigantic worms through the soil is attended by gurgling and sucking sounds clearly audible to persons walking on the surface. Their eggs resemble large olives. Related species which attain a length of several feet are found in parts of South America, Java and other sections of the world.

(By Ruth Rogers)

Treasures Of Harewood House

Henry Lascelles, Original Owner, Was West Indian Millionaire

Harewood House, near Leeds, England, where the King and Queen spent a week-end in August, with the Princess Royal and Lord Harewood, was built about 150 years ago at a cost of £120,000. It took 12 years to erect. The State apartments command a magnificent view of beautiful Wharfedale, and contain some wonderful ceilings, plaques and paintings, as well as some of the finest specimens of Chippendale furniture in the world. Henry Lascelles, the son of the Harewood family, was a West Indian millionaire, and in Harewood House there are nearly 80 massive mahogany doors made from wood grown on the West Indian estates.

A WRAP-AROUND MODEL FOR YOU IF YOU'RE A WEE BIT HEAVY

Still another smart and flattering style for matrons.

And it's cut on the wrap-over lines so becoming and liked. There's a slenderizing bias line at the front and at the back that reduces the hip bulk. The shawl collar is very becoming. And don't you like the shawl sleeve cuff?

So many charming materials can be used for this slim-line model.

The original was rhum-brown wool crepe with white pique trim.

It's perfectly stunning in black or navy blue with white pique trim.

Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

CANADIAN DELEGATES GO TO GENEVA

Hon. C. H. Caban, Secretary of State for Canada (right) has sailed for Geneva to head the Canadian delegation to the meetings of the assembly of the League of Nations convened on September 26. He is accompanied by Madame Charles Fremont (left), who is one of the three delegates representing this Dominion.

A Mark Of Distinction

Ability To Keep Eyes Open and Mouth Shut

A man seeking a job advertisement in this way in a New York newspaper: "I have just enough brains to keep my mouth shut, my ears open and present a good executive appearance. Do you need a front?—your business?"

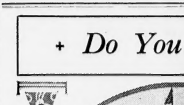

We suspect the gentlemen is not being quite frank with his public. Probably he is a very shrewd, capable person who thinks an air of humility, of self-deprecation, an original line of approach, may achieve the results likely to be denied a more orthodox recital of his good qualities.

The fact is, of course, that ability to keep the mouth shut and the ears open is a mark of considerable distinction and a virtue commonly denied to a great many persons. The "front" of "good executive appearance" and "nothing to back it up" is much more apt to keep his mouth open and his ears shut. If he knows enough to reverse the process he is more than just a front.—Ottawa Journal.

Cooked Salad Dressing

1 cup evaporated milk.
1/2 cup water.
1 teaspoon dry mustard.
1/2 teaspoon salt.
1 can evaporated milk.
1 tablespoon granulated sugar.
2 tablespoons flour.
Dash of cayenne.
2 egg yolks.
2 tablespoons butter.
1/2 cup vinegar.

Blend evaporated milk with water and bring to scalding point in a double boiler. Thoroughly mix dry ingredients. Add slightly beaten egg yolks gradually and blend carefully. Add hot milk slowly over egg mixture, stirring constantly. Return to double boiler. Add butter and cook until mixture thickens, stirring constantly. Heat vinegar, and add slowly. Blend thoroughly. Strain and cool. Makes 1 1/2 cups.

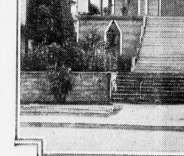

COOKED SALAD DRESSING

Add hot milk slowly over egg mixture, stirring constantly. Return to double boiler. Add butter and cook until mixture thickens, stirring constantly. Heat vinegar, and add slowly. Blend thoroughly. Strain and cool. Makes 1 1/2 cups.

The old-fashioned country physician was one of the heroes of his profession. Scientific names no longer dignify the shrewd physician who administered "good" with his pills and powders. Under conditions that would be considered impossible today, he performed many feats of surgery. No mind was too deep and no blizzard was too blinding to keep him from answering a call to duty. The midnight heat of hoofs along the pike usually meant that he had sacrificed another night's rest in order to relieve some one's suffering.

The old-time country doctor is passing. As with the circuit rider and the corporeal, his title will eventually become extinct. But the recent assemblage in Kansas shows that modern medicine can well afford to honor the traditions of courage and duty that thousands of country doctors left behind them.—New York Evening Post.

Recipes For This Week

(By Betty Harcin)

ORANGE AMBROSIA DESSERT

(Serves 4-6)

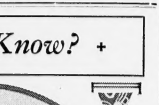

This is a modern version, adapted to salad serving, of the ambrosia, which was Grandmother's favorite company dessert. Ambrosia, by the way, was the food served the Greek gods in their feasts on Mount Olympus. While this ambrosial and delectable combination of orange concoction will not confer the immortality given by the ambrosia of the gods, it is a dessert par excellence for better health.

6 oranges.
1/2 cup strained honey.
1 can evaporated milk.
Peel oranges, removing skin down to juicy pulp. Cut in slices and cut slices in half. Dip each piece of orange in honey which is placed in a shallow dish, then in coconut. Arrange on crisp lettuce leaves. Serve with whipped cream to which a little mayonnaise has been added.

COOKED SALAD DRESSING

1 cup evaporated milk.
1/2 cup water.
1 teaspoon dry mustard.
1/2 teaspoon salt.
1 can evaporated milk.
1 tablespoon granulated sugar.
2 tablespoons flour.
Dash of cayenne.
2 egg yolks.
2 tablespoons butter.
1/2 cup vinegar.

Blend evaporated milk with water and bring to scalding point in a double boiler. Thoroughly mix dry ingredients. Add slightly beaten egg yolks gradually and blend carefully. Add hot milk slowly over egg mixture, stirring constantly. Return to double boiler. Add butter and cook until mixture thickens, stirring constantly. Heat vinegar, and add slowly. Blend thoroughly. Strain and cool. Makes 1 1/2 cups.

The old-fashioned country physician was one of the heroes of his profession. Scientific names no longer dignify the shrewd physician who administered "good" with his pills and powders. Under conditions that would be considered impossible today, he performed many feats of surgery. No mind was too deep and no blizzard was too blinding to keep him from answering a call to duty. The midnight heat of hoofs along the pike usually meant that he had sacrificed another night's rest in order to relieve some one's suffering.

The old-time country doctor is passing. As with the circuit rider and the corporeal, his title will eventually become extinct. But the recent assemblage in Kansas shows that modern medicine can well afford to honor the traditions of courage and duty that thousands of country doctors left behind them.—New York Evening Post.

THAT in Vancouver, British Columbia, the Hindu residents have established the Sikh Temple shown above where they carry on their own religious life under their own priests and leaders. As far as is known it is the only Sikh Temple in North America. Vancouver has a large Oriental and East Indian population.

Ceremony Postponed On Account Of Crowds

Final Stone Of Canadian Memorial At Vimy Not Laid

Hanging from the end of a great crane a nine-ton stone is poised over the summit of Canada's memorial at Vimy Ridge while mayors of neighboring towns and other notables are wondering why the ceremony of completion was interrupted.

At the last moment, Brig.-Gen. H. H. Hughes, after conferring with the builders, decided the stone should not be laid, Apologies were tendered to the French guests, who accepted them with graceful gestures and puzzled glances at the last stone still hanging far above them.

It was explained afterwards an employee of the Canadian authorities had circulated news of the memorial's completion with misplaced zeal, causing a party of eminent visitors to alight at Vimy. Brig.-Gen. Hughes, whose home is in Victoria, B.C., directed the construction work and intended the ceremony of completion to be private.

Actual completion of the memorial is not expected until the latter part of 1934, as sculptured figures of heroic acts are yet to be carved on the higher levels. The topmost figure will be 80 feet above the main platform. One figure on the lower level, representing the spirit of Canada, is already sketched.

Towering 125 feet above the Ridge and containing 6,000 tons of flawless stone, the structure commemorates the Canadian victory at Vimy. It has been under construction since 1925.

British Speed King Married

Keye Don Disclosed Fact Before Selling For Home

Keye Don, the 40-year-old dapper British speedster, has disclosed the fact that he was a bridegroom as he sailed for home without his bride—21-year-old Ellen Martin, daughter of the wealthy and socially prominent Mr. and Mrs. Leonard J. Martin, of Greenwich, Conn.

She had some "business affairs" to look after, he explained, but he intended to join him in England, and then they will go to Italy for a honeymoon.

Don said the ceremony was performed in Greenwich, but would give no other details.

He and his bride first met in New York a year ago, when he first made his unsuccessful attempt to take the Harmsworth speedboat trophy from Gar Wood.

Later Miss Martin went to school in Germany and they continued their courtship in Europe. Don said the wedding was all arranged when he arrived for the races this year.

Veteran Doctor Honored

Kansas People Pay Tribute To Tradition He Represented

When nearly 700 townspeople assembled at Mulvane, Kansas, recently to honor the veteran physician who has unswerving loyalty to the town, they paid tribute not only to an individual but also to the traditions he represented.

The old-fashioned country physician was one of the heroes of his profession. Scientific names no longer dignify the shrewd physician who administered "good" with his pills and powders. Under conditions that would be considered impossible today, he performed many feats of surgery. No mind was too deep and no blizzard was too blinding to keep him from answering a call to duty. The midnight heat of hoofs along the pike usually meant that he had sacrificed another night's rest in order to relieve some one's suffering.

The old-time country doctor is passing. As with the circuit rider and the corporeal, his title will eventually become extinct. But the recent assemblage in Kansas shows that modern medicine can well afford to honor the traditions of courage and duty that thousands of country doctors left behind them.—New York Evening Post.

Education Investing

Money Spent In This Way Is Never Wasted

The nation should spend not less money, but more, on education. An elementary school child costs the public \$65 a year, a secondary school around \$100. Who so foolish as to regard these moderate sums as excessive, or too burdensome for the nation to carry? Every penny spent on education is an investment which brings a hundredfold return. There is no asset comparable to a generation sound in mind, healthy in body, and adequately equipped to fight the battles of life.—London Daily Herald.

DEFINITE HELP FOR DWELLERS IN APARTMENTS

Odorless fume found to cook fish, cauliflower and cabbage

CANAPAR IS A PRODUCT OF CANADA

Lives there a woman in an apartment, duplex or home, who has not at some time or other been vexed by the odor of fish, cauliflower and cabbage? Or who has not suffered from other people close by who cooked these foods regardless?

Canapar entirely does away with this annoyance. More than that, it actually improves flavor and food value. Cooking in Canapar parallels the famous French method of simmering and confining food and its flavors to the closed casserole.

Canapar comes in large sheets, in a handy-size package. When boiling vegetables you simply wet the sheet of Canapar and make a bag similar to a pudding bag. If you are steaming them you line your steamer with Canapar, arrange food and seasonings in it, and tie the rim of the Canapar to prevent steam from dripping back.

Bolled or steamed fish is particularly delicious done this way. No fatty odor in the kitchen, no gummy fishy taste. When roasting meat, line the pan with Canapar. This will keep the fat and juices from burning, and eliminates scorching of the meat.

Canapar saves fuel. You can cook three vegetables simultaneously in the same quantity of water. With its variety of flavors. And it is very economical. It is made of paper, which is not burning it on the towel rack to dry. Use it over and over again.

Lots of women use Canapar for a dish cloth—it is so silky and satisfactory and it is so easy to wash. It is a good use if you happen to prefer the sheet of Canapar to the old-fashioned dish towel.

Canapar is made by the makers of PAKA-SAN, the famous heavy duty paper in the Green Box.

Special Offer

Most grocers, druggists and department stores carry Canapar. If you don't, send the coupon direct and we'll give you a new Canapar box containing a bonus of one hundred recipes as a bonus for your trouble.

Applied Paper Products, Ltd.,

New Richmond, Ontario.

Enclosed find 25c for which please send me one full-size package of CANAPAR and one 100 recipe for "Let's-cook."

Altitude Records

Two British Pilots Make Claims To New High Records

British pilots, flying at opposite ends of the Empire, have advanced claims to two new aviation altitude records.

Captain Cyril Uwins claimed a new record for land planes, with a flight to 40,000 feet at Bristol. The official record is 43,519 feet, held by Lieutenant Apollo Cookey, United States Navy.

At Port Darwin, Australia, an amphibian attached to the British navy's ship "Hermes" was reported as claiming a new altitude record for that type of ship, with a flight to 25,000 feet.

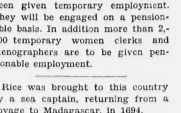

It was also claimed that a balloon released from the "Albatross" (without passengers) reached a height of 70,000 feet, or more than 13 miles. This was set up as a record. There are no official records for passenger balloons. Professor Auguste Piccard rose nearly 11 miles over Italy in his latest stratospheric ascension.

Many Veterans Employed

England has completed arrangements for the retention permanently in the government employ of more than 13,000 ex-service clerks, who had been given temporary employment during the war.

They will be engaged on a pensionable basis. In addition more than 2,000 temporary women clerks and stenographers are to be given pensionable employment.

Rice was brought to this country by a sea captain, returning from a voyage to Madagascar, in 1694.

surface of the soil. A sunny position should be chosen for the tall headed varieties.

Penny can stay in the same place for many years, but in time the flowers begin to fail and grow smaller than they used to do. When this occurs it is time to move and divide them. September is the best season to do this. If it is possible to give them a new bed it is better to do so. If this cannot be done then the plants should be dug up and the old soil removed and new, good soil put in its place. A handful of bone meal for each plant should be mixed in with the new soil. After digging the plant wash off all the soil and

HEALTH

The work of the modern health department is more or less familiar to all of us. There is a tendency to place responsibilities with the department which it can never be expected to assume. The department can do certain things and do them well, but the health care of your child must be given chiefly by you, his parents, not by the health department.

The child's health depends, in the beginning, upon the care the mother has during her pregnancy. Proper care throughout pregnancy and at delivery not only safeguards the mother but protects the child, and secures for the child a good, fair start in life. The health department will supply the mother with printed instructions, but she

divide the roots as carefully as possible. Divisions with four or five eyes are the best for an ordinary garden, though smaller divisions can be made if a larger number of plants are required. Peonies should be planted so that there is two inches of soil above the eye. Too deep planting is one of the causes why peonies fail to bloom.—Exp. Farms Note.

herself must go to her doctor to secure the supervision she needs.

After the baby is born, the best way for the mother to give health to the child is to breast feed her baby. When the time comes to wean, then the health department should have available a supply of pasteurized milk.

One of the greatest public health achievements of the past is the pasteurization of milk. As a result of the pasteurization of milk supply, there has been a great reduction in the summer diarrhoeas of young children, abdominal and bone tuberculosis and other diseases spread by milk. The care of the milk, keeping it clean after it is delivered, is a responsibility of the home.

You can have your child protected against two diseases, one of which years ago used to take

the lives of many and scar the rest—smallpox, the other, which still continues as a major cause of deaths among children—diphtheria. Protection against these two diseases is available, but that fact will not protect your child; you must have him vaccinated against smallpox and immunized against diphtheria if he is to be safeguarded.

When the baby stages is passed, the child still needs care. During his pre-school years he establishes his habits of life, which will determine, in large measure, his physical and mental health in later years. Physical defects, such as diseased tonsils and adenoids, commonly develop at this period of life. They should be corrected by proper treatment, and not allowed to continue, as they may cause serious harm to the child. Your child will be far more

likely to grow up a healthy, happy, useful citizen if you make use of the knowledge which is available concerning child care, rather than if you trust to chance.

To give your child physical and mental health is the greatest success which you can achieve, and it will give you more satisfaction than anything else in life.
